Technical parameters

Voltage: 110V
Rated power: 500W
Specification: 45.5x32x39.2cm
Waterproof grade: IPX4
Rated capacity: 4L

Working environment

Ambient humidity: 10°C-35°C
Relative temperature: below 95%
(when temperature is 25°C)
Atmospheric pressure: 86kPa~106kPa

MAIN FEATURES

One button to start: open the foot bath massager with all function start at the same time, which is convenient and simple to operate.

Digital display: visual digital display makes foot bath massager easy to be understood and easy to use.

Portable design: humanized design makes the move and lift of the foot bath massager more convenient.

Automatic heating: foot bath massager using PTC heating, can effectively control and maintain comfortable water temperature for human body. After startup, the product will automatically adjust temperature from 35°C-48°C. When reaches the set temperature, the massager will maintain a constant temperature, making you enjoy the comforts brought by the foot bath massager.

Oxygen gas wave: foot bath massager can produce gas wave, generate water resonance and stimulate the foot acupoints, improve foot microcirculation, and produce soft massage effect.

Temperature setting: temperature range 35°C-48°C. The suggested foot bath temperature is about 42°C.

Time setting: time setting range 10-60 minutes. The suggested foot bath time is 30 minutes.

Sensing button: touch button to open or close all kinds of functions.

Automatic massage: stimulate the foot acupoints, relieve fatigue and make you refreshed.

Frequency conversion: change the power supply frequency, adjust the load, reduce the loss and extend the foot bath massager service life.

Heat insulation dust cover: when heated, it is more effective to maintain constant temperature. When not used, it can effectively prevent the erosion of the massager body.

External drainage function: after use, the massager can drain water through external drain-pipe, which is simple and convenient.

02 PRODUCT INTRODUCTION

External drainage function: after use, the massager can drain water through external drain-pipe, which is simple and convenient.

Medicine box: the massager can put foot bath massage medicine to enhance foot bath effect.

AUTOMATIC MASSAGE ROLLER

03

3D automatic Tai Chi massage roller

Tai Chi type bidirectional electric massage roller, Tai Chi concentric reverse massage plate, contain the concept of traditional Chinese tai chi health cultivation concept, coupling hardness with softness, follow with Qi direction, 360-degree omni directional foot bottom massage, enhance physique and improve sleep.

3D automatic scraping massage

Scraping therapy can improve microcirculation, promote blood circulation, relieve fatigue, get off cold and do conducive to sleep.

3D automatic scraping massage+3D automatic Tai Chi

massage roller Combine scraping massage and Tai Chi roller. Combination of two kinds of massage: Tai Chi type bidirectional electric massage roller, Tai Chi concentric reverse massage plate, contain the concept of traditional Chinese tai chi health cultivation concept, coupling hardness with softness, follow with Qi direction, Scraping therapy can improve microcirculation, promote blood circulation, relieve fatigue, and get off cold and do conducive to sleep.

Press message function to start, and press again to close the function.

Press once to open the gas wave function and press again to close the function.

Press button once to show the current time, then each press will reduce 10 minutes; the set range is from 10-60 minutes.

With power connected, press once to open heating function and press again to close.

In the heating state, press once to show the present temperature, then each press will increase 1 degree Celsius temperature. The temperature is adjusted between 35-48°C.

When power on and heating, the default heating power is 500W. When the water temperature reaches the set temperature, you can press the frequency conversion to change the power to 400W or 300W and enter into save energy, heat preservation mode.

In the case of standby, press "button start" to open all functions of the machine. The default machine running time is 60 minutes, temperature is 42°C. Press once again to close all functions.

1. If the liquid leaks from the machine, please do not use it so as to avoid electric shock.
2. Do not deliberately trample the machine and it is strictly prohibited to stand on it, in order to avoid damage to the machine or cause electric shock or scalds.
3. Do not move the machine during usage. Do not use wet hand to pull the plug.
4. If the power cord or any components or parts are damaged, please stop using it immediately. Do not dismantle or change and should repair or replace product in our company or at our company's dealers. This is to avoid short circuit, fire, electric shock, injury etc..
5. Please do not pull hot water over 50°C directly into the foot bath massager, in order to avoid scald or product shape deformation.
6. Please do not plug the power cord to start the machine without water, otherwise the product overheating may cause fires, scald or damage to the machine parts.
7. When use, body should not touch metal conductor, such as metal chair frame, heating radiator or other conductive materials which is connected with the ground.
8. When with empty stomach, satiation or drunk, it is prohibited to use the machine.

Control panel connect with the power and switches of the machine. Water enter is strictly prohibited. If there is water, please disconnect the power and dry it. Please do not add or pour water through control panel side.

**COMMON PHENOMENA HANDLING**

phenomenon	inspect method	handling method
incrustation	water mass heavy or dirty	Soak with oxalic acid or white vinegar for 10 minutes then wash.
no heating	Do not open the heating switch without water (with internal double thermal protection devices) No power	After the temperature decrease, check power and make sure it is connected.
not working or stop working	After turning on the power, the switch is not pressed. Foot bath time is up, water temperature is too high.	Operate according to user's manual and time setting button. Mix with cold water to cool water temperature.

FOOT BATH KNOWLEDGE AND PROTECTIVE MEASURES

1. Before using, the machine should be placed on the level ground. It is recommended to use a separate power supply and do not contact with other electrical appliances.
2. It is recommended to use twice every day, once respectively in the morning and evening. Every time 30 minutes, the water temperature at 42°C.
3. When do foot bath massage, all body pores will open, please do not let electric fan or air conditioning blows directly to the body to avoid get cold.
4. It is easy to sweat during use, so it is suggested to drink about 250 ml warm water before use.
5. When used, the dirt in the water will be accumulated on the inner wall of the machine. Please wipe up after use.
6. The appropriate time to use foot bath massager is one hour before or after a meal. After foot bath massage, don't stand up and leave immediately, please rest for 2-3 minutes, and then walk around.

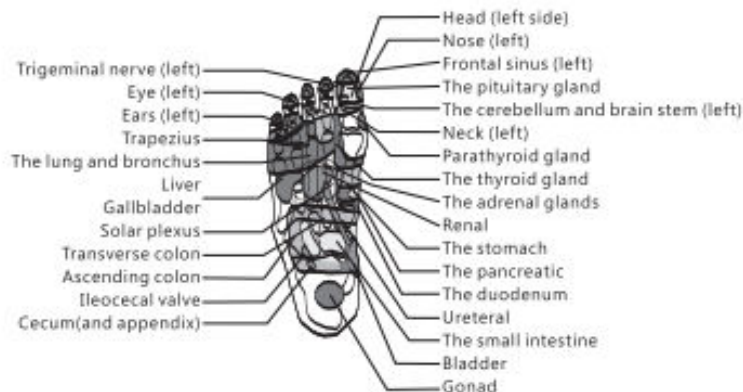

Attention:

Temperature display value is only for reference. There will be slight difference because environment different.

In order to avoid damages caused by high temperature contact, please slowly adjust temperature from the default temperature (42°C), and choose the most suitable temperature for personal use from usage experience and enjoy the most comfortable foot bath massage. Foot bath massager is not a medical device and cannot replace the cure function of medical device.

PROTECTIVE MEASURES

- ① Overheating protection system
- ② Voltage safety protective control device
- ③ High quality plastic, high temperature resistance, aging resistance
- ④ The installation components have pass quality and safety certification, safe and reliable.
